Blind Rivets & Rivet Nuts Systems
for Non-Structural Applications

The Inventor Of The Blind Rivet

There is a reason our name is synonymous with blind rivets: POP® was the original manufacturer of this innovative design. Today, POP® continues updating and improving our products to remain a step ahead of modern assembly needs.

Trusted by manufacturers worldwide, the POP® rivet range includes a wide variety of high-quality fasteners that will meet the needs of your demanding manufacturing assembly process.

The ability to set POP® blind rivets without the need for access at the back of the work piece makes their use mandatory in many instances. Their many additional advantages also make them the logical choice in numerous applications where the blind rivet setting feature is not of primary importance.

Premium Engineered Blind Rivets

Comprehensive range of world renowned, premium quality fasteners. Offered as custom product with PPAP testing and design support, or an off-the-shelf solution.

POPNut® Blind Rivet Nuts

Available with a variety of geometries and materials, blind rivet nuts are ideal to secure load bearing threads in thin materials.

Hand Tools

Professional hand plier and lever rivet and blind rivet nut tools with ultra-lightweight yet robust steel and aluminum construction.

A step towards a simpler portfolio for hand tools
